

CANDLES, CHAFING FUEL & PAPER STRAWS

PROFESSIONAL RANGE TO THE HOSPITALITY INDUSTRY

CANDLES & CHAFING FUEL

We have pleasure introducing, to the UKs distributor network to the hospitality industry, our range of professional grade candles and chafing fuel

All products are fully UK tested, and have the necessary environmental credentials (see below)

Our range represents the vast majority of the needs of the hotel and restaurant industry, however, for specific products which do not appear in our range, we may be able to source and supply, depending upon your volume requirement

We look forward to hearing from you

Pillar Candles

Create warm ambience in your restaurant, function room, marquee or bar. Our pillar candles can sit in an open environment, or in a storm lantern or vase. Combined with flower or foliage* displays they will create a beautiful centre piece. Our pillar candles in traditional ivory colour are available in the popular professional use sizes and offer a long life clean burn

Chafing Fuel 'Just Heat'

Fully tested, odourless and non-combustable unless the wick is present. Our chafing fuel is fully designed for food heating in a professional environment. The can is relightable and therefore reusable with no wastage. When lit, the can will remain cool to the touch, reducing the risk of burning

- Tested to 6 hour burn time
- Non flammable (requires wick to light)
- Fully smokeless and odourless
- Diethylene Glycol fuel
- Relightable wick
- Reusable plastic wick shield
- Ideal for use with chafing dishes, warming trays and food warmers
- Fully designed for professional use
- Cool touch can, even when alight

Chafing Fuel

210g Liquid

6 Hour Burn Time†

Relightable Wick with Plastic Cover

24 cans per carton

Code: **SUPCTB001**

†Burn times are approximate.

PAPER STRAWS

Our straws are manufactured to the highest environmental and ecological standards, containing zero synthetic chemicals and being 100% compostable, both of which cannot be claimed by all manufacturers and importers. You are welcome to use this information as a selling tool, with your customers

We use premium materials, such as paper matching McDonald's standards, high-viscosity heat-resistant adhesives from Henkel and BASF, and eco-friendly, fully biodegradable food-grade inks

During the paper cutting process, we add 1mm in width of paper. This enhances the bonding area during rolling. Also, a heating element has been incorporated directly into the rolling process. This ensures that the adhesive dries instantly upon bonding

The result is a dramatic improvement in the material's durability, resulting in the straw being exceptionally sturdy and long-lasting whilst in use, whilst complying with every possible environmental criteria

Sales Office: sales@singleusepaperco.com

Sales Office Landline: **01325 525888**

Zero PFA or PFAO synthetic chemical content
